Installation

NOTE: This kit will not work with round mix chambers (i.e. ARXXXX or PCXXRD). If there is a round mix chamber in the gun, replace it with a flat mix chamber. Smaller flat mix chambers can be ordered for lower fluid flow applications. See Flat Mix Chamber Kit chart.

Flat Mix Chamber Kit*	Type	Flow Rate (approx.) at 1000 psi (7.0 MPa, 70 bar)
AF5252 / PC52FL	Standard	15 lb/min (6.81 kg/min)
AF4242 / PC42FL	Standard	11 lb/min (4.99 kg/min)
AF2929 / PC29FL	Standard	7 lb/min (3.18 kg/min)

* Includes mix chamber and cleanout tool.

NOTE: A FTM979 Stud Wall Tip is included in this kit.

NOTE: FTM762 Stud Wall Tip is available for lower fluid flow applications as an accessory.

	FTM979 Stud Wall Tip	FTM762 Stud Wall Tip
Pattern size	22 in. (559 mm)	14 in. (355.6 mm)
Spray distance	2 ft. (0.61 m)	2 ft. (0.61 m)
Fluid flow‡	15 lb/min (6.81 kg/min)	13 lb/min (5.90 kg/min)

‡ When used with mix chamber AR5252 at 1000 psi (7.0 MPa, 70 bar).

NOTE: The small plastic o-ring on the end of the flat mix chamber must be removed.

1. Remove the existing air cap (round or flat) from the Fusion Gun and replace it with the adapter (1). Thread the adapter onto the mix chamber until it bottoms out.

2. Insert the packing (2) through the center of the adapter (1) with the stepped end facing the mix chamber.
3. Place the stud wall tip (4) onto the packing (2) and tighten the air cap (3) with light hand force.

NOTE: Stud wall foam kit (249421 only) must be series “B” or later to be compatible with the Fusion PC spray gun. The length of tip packing (2) was increased to improve sealing. If the air cap (3) bottoms out before packing (2) is compressed, replace packing (2).

NOTE: Overtightening may distort the packing inside the mix chamber. Reopen the hole with the 0.94 in. (3/32 in., 2.39 mm) drill bit provided if necessary.

4. Adjust the tip orientation with a standard 5/16 in. nut driver (provided with gun). See FIG. 1.

FIG. 1

Cleaning Tips

1. If the pattern begins to shrink or becomes distorted, relieve pressure (see your gun manual) and clean the internal dome of the tip (4) with the tip cleanout tool (15D234). See FIG. 2.
2. Clean out the inside diameter of the packing (2) and the flat mix chamber with a 0.94 in. (3/32 in., 2.39 mm) dia. drill bit (Graco cleanout tool kit 246624).
3. Add a thin layer of lubricant on the outside faces of the air cap (3) to ease cleaning.

FIG. 2
