

# FULL COVERAGE CONSISTENCY

## SIDEWINDER DRUM HEATER

Sidewinder's newly designed drum heater offers multiple features with the user in mind. The blanket is designed to apply heat where the liquid is no matter how full the drum. With an integrated temperature sensor, you can set and monitor your temperatures making sure the blanket is at your desired warmth. The controller is attached to a tether and comes with a clear-window pocket providing security to the user. With Sidewinder, you can count on full coverage consistency.

The Sidewinder Drum Heater is made of a rugged poly-vinyl coated nylon outer shell, and high-density polyethylene foam, to keep the warmth in, and the cold out. The proprietary heating element is infused into a rugged foil, giving the blanket a sleek profile allowing for ease of install, roll up and storage. The blanket also comes with a storage bag to keep the product clean and sharp.

### THERMAL RETENTION

High density polyethylene keeps the warmth in, and a proprietary coated nylon keeps the cold out.

### EASY INSTALL

Military grade Hook & Loop closure with snap buckles makes for an easy and sturdy install.

### OPTIMIZED FOR OPERATION

The programmable controller offers the operator full control of temperature settings.

### GO HIGHER

Sidewinder features a proven combination of insulation with a proprietary cover to remain extremely lightweight, flexible and compact.

#### Features & Benefits:

- Lightweight; easy to install & store
- Integrated temperature controller to adjust and monitor heat
- Storage pocket to protect controller from damage
- Hook & loop closure, with straps/buckles
